

2012 CHARLESTOWN CONSERVATION COMMISSION COMMUNITY RAIN BARREL PROGRAM

Sponsored by
Charlestown Conservation Commission

At 60-gallons, this rain barrel is one of the largest on the market. The heavy duty barrel stands 39" tall by 24" wide and weighs 20 lbs and will last for years, due to its rigid, 3/16" thick walls. Each individual unit comes complete with threaded spigot (for easy hose attachment), overflow fitting, drain plug, screw-on cover, screen, and complete instructions. The rain barrel ships ready to be linked to second or third barrel - without the need for a special linking kit (all that is needed is standard, 3/4" hose). Made in the USA from clean, recycled food grade barrels. Link two or three barrels together and you can save up to 180 gallons of precious rain water. Comes in green, gray, or Nantucket brown.
Item #1 -60 Gallon Rain Barrel - \$75

Easy to attach to your downspout to capture the rain. Delivers rain water over & into your rain barrel.

Item #2: Rain water diverter - \$25 each

IMPORTANT!
